

WE'RE
WITH YOU
EVERY
BABY-STEP
OF THE
WAY

 Genea

LET'S TALK ABOUT SEX

THEN LET'S TALK
ABOUT YOU

HI, WE'RE GENEVA, NICE TO MEET YOU.

We know that making a baby isn't always like it is in Hollywood Rom-Coms. For some it's much harder. And that's what we're here for.

At the start of the IVF journey, many people research technology and success rates. Geneva are leaders in both. But equally as important are the people on the journey with you and the support they offer.

YOU'RE A PERSON, NOT PATIENT 0021

To us you're not just patients, you're people, and we'll treat you that way. We want this almost as much as you - our love for making babies isn't baby-sized, we've been doing it for over 30 years and we don't plan on stopping any time soon. Over half of the people who come to us don't end up needing IVF to have their bub, so your treatment will be tailored to you and your body.

YOUR DEDICATED BABY MAKING EXPERT

At Genea, everyone's journey starts and ends with a dedicated Fertility Specialist. Your doctor goes through everything with you from planning, consulting and doing all the bits they're trained to do to get you pregnant. You could say, they're your new, or extra, partner in this!

THERE'S A YOU IN TEAM

Our approach is unique. Alongside your dedicated doctor, you have access to a team who know everything that's happening on your journey – nurses, scientists and counsellors, all tailoring your experience and communicating with one another to ensure you receive a comprehensive, supportive and personalised plan. There's one goal, making a baby.

BABY IS NEVER ALONE EITHER

Just like you, we want your embryo to feel the love too. When your embryo is growing inside our Geri[®] incubator, the Grow by Genea[®] app allows you to access photos and videos while they're in their cosy home. So no matter what time of day, you can always say hello and feel more connected. 94% of people said doing this improved their IVF experience.

To meet the people who will be with you
on your IVF journey or find out more about
our technology, book a consultation today
